

Department of the Interior | National Business Center | Modernization Program Office
Indoor Air Forum Quality Meeting

Monday, May 21, 2007, 2 p.m.
Room 2507: Modernization Program Office Conference Room

Attendees:

Modernization Program Office: Gay Bindocci, Jeremy Lawson

Facilities Management Division: Ian Rosenblum

Building Occupants: Greg Rabida, Jan Elmore, Terry

Points of Discussion:

- An attendee smelled something that resembled All Spice in the 6400 corridor. This occurred once and did not repeat.
- Attendees questioned the value of SaLUT air quality reports as many boxes in the charts were filled with N/A. Occupants wanted to know what this meant exactly, and whether or not they were providing adequate information
- Attendees requested that painting be moved off hours to the night shift in order to prevent odor problems throughout the building.
- Ms. Bindocci noted that a new, water-based duct sealer was approved for use in place of an oil-based sealer.
- Excessive amounts of refuse are being stored in the garage and are roped off. Attendees questioned whether more of this trash could be removed from the premises faster.

Action Items:

1. Contact GSA IH James Hodges regarding questions about SaLUT air quality reports.
2. Discuss with contractor possible acceleration of removal of refuse from the garage area.
